Press Note.

The attention of Government has been drawn to a cartoon in a local newspaper representing the Electricity Department as a Shylock in the matter of effecting disconnection for non-payment of arrears. The cartoon indicates that the departmental men turn up after night-fall for disconnection. Government wish to point out that this is entirely incorrect, since disconnections are always done in the mornings to enable the consumers to make payment in the afternoon and get the re-connection to their installations the same day. The consumers are given a clear fourteen days' time from the date of the receipt of the bill to clear them. It is only after the fourteenth day that the disconnections are made. It may also be noted that if and when consumers produce the necessary vouchers or money order receipts or counter foils of cheques to show that payments have been made, disconnections are not effected.
